**DETAILED ACTION**

Claims 1-8 and 51-62 are pending in this application.

***Drawings***

The drawing(s) filed under 37 CFR 1.184 or 1.152 are acknowledged by the examiner.

***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on February 14, 2007 was noted and the submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner has considered the information disclosure statement.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by**

**Fotinos (US 6,416,048).**

The applied reference has a common inventor with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Figures 7a and 7b as described in column 3, lines 52-64 of Fotinos disclose a rigid card comprising a release liner, a gliadin and ceramide dispersion formed adhesive and a backing layer. Column 6, lines 57-63 disclose that the backing layer can be made of any suitable material known in the art and can be transparent, opaque or flesh-toned. From the figures we can see that the adhesive are contained in a pattern which can be parallel. Column 7, lines 22-59 disclose examples of therapeutic, cosmetic or active agents used for skin protection which can be used in the invention. Column 8, lines 4-7 disclose that the present invention is sterilized by the use of gamma radiation techniques. Column 8, lines 8-10 disclose that the invention can be folded and encapsulated in a hard capsule.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

**Claims 51-62 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject**

**matter which applicant regards as the invention.** Applicant recites the phrase "removably attaching" in claim 51 when describing a film comprising the active agent. It is unclear to the examiner what is exactly meant by "removably attaching". Please clarify. Claims 52-62 are rejected for depending upon a rejected claim.

***Conclusion***

Claims 1-8 and 51-62 are rejected.
